

LAMINATED BLOCKS

Fiske - The Environmental Alternative To EPS & Foam Packaging...

Looking for that environmentally friendly alternative to expanded polystyrene and foam packaging inserts, then look no further than **SH Fiske**.

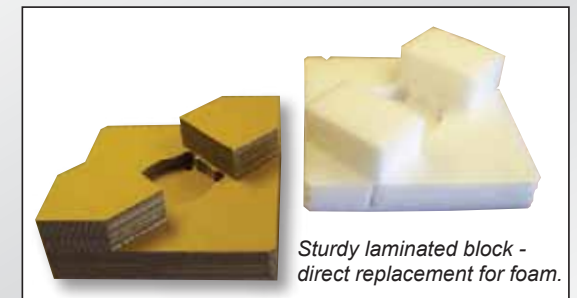

SH Fiske have developed a unique manufacturing technique of laminating pre-cut corrugated cardboard sheets together to form a solid block with apertures in just the right place with the correct profile to fit and protect your product!

So, why not get **SH Fiske** to design out your eps or foam packaging in favour of the more environmentally conscious corrugated cardboard.

We provide fully working prototypes so you can do your drop test and ensure everything is as you expect before manufacturing starts. Our fully equipped CAD studio, sample-making table and sample service is here to help you.

*“Corrugated cardboard has a recycling rate of 84% in the UK.
This is the highest recycling rate of any type of packaging in the UK”*
